Murrieta Fire Department OES 8634 - Deployed to the Sand Fire

On his first day as a Captain, Joe Bourque responded with Engineers Schaaf and Stang, and Firefighter Hamilton to join the fire fight on the Sand Fire near Santa Clarita, California

Under the guidance of Mike Macalinao, Brandon Roach, and Travis Anderson, a class of 38 Explorers started their week-long training on July 25.

- Lessons learned from the I-Street Fire – Carlsbad: Aug 2
- National Night Out: Aug 2
- FRI San Antonio – Fire Chief Teaching Aug 18

Dear Murrieta Fire Department
I am thankful for your service to our city. Thank you for being one of our first responders, someone we can count on when things go awry. Your service isn't taken for granted.
Sincerely,
Shari Hansen

RANDOM ACT OF KINDNESS

Earlier today (July 20), members of the City of Murrieta Fire Department and Murrieta Police Department - were in the City of Riverside on business and experienced a random act of KINDNESS! While eating lunch at Ancho's Southwest Grill & Bar, 3 generous women quietly paid our lunch bill and wanted to express their heartfelt gratitude for our service and thanks to all the members in public safety who selflessly do their jobs each and every day. - Dawn

BE THE REASON SOMEONE SMILES TODAY

TRAINING – *Captain Sean DeGrave*

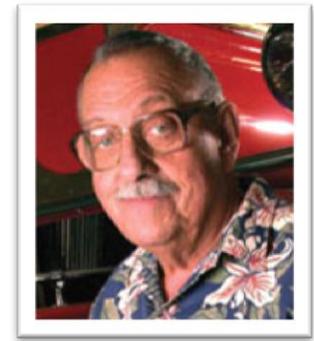

Notes on Punishment

Alan Brunacini

Fire Engineering – May 2016

IN RECENT COLUMNS, I TOLD THE STORY of becoming a Battalion Chief (BC) and then being assigned to a battalion that had historically been used as a special place to punish those organizational leaders considered outspoken, verbally out of control, and generally unacceptable. My sin was I successfully got through the beginning level (BC) command officer promotional process at an age/level of experience that was way too early according to my chief officer boss, who reluctantly promoted me. I did not have profound feelings about the dynamics of punishment or really think much about it, probably because I was never on the receiving end of the punishment process. Up until then, I had a fairly normal career; I got along with my colleagues and bosses and quietly was promoted a couple of times before this trip to Devils Island.

As I went through this promotion/punishment adventure, I experienced not only being the (very personal) recipient of “negative discipline,” but at the same time was also becoming the boss of a battalion full of characters who also were being punished by their assignment for a completely different set of reasons. The foundation of this craziness was based on the organizational leadership’s using the prospect and the reality of the fear of punishment to somehow control behavior. No one (including me) could have predicted the effect this experience would have on me for the rest of my life as a boss. I realize telling this unusual story will create a slippery slope because it very probably is contrary to many of the traditional perceptions of how punishment fits into the framework of standard fire service personnel management and administration.

Those who regularly administer the punishment end of the personnel process have probably been raised and socialized in a system where the regular application of punishment has been normalized as a way of organizational life.

Context of My Story

I now must establish some basic context for telling my story. I decided to become a firefighter when I was four years old; I became one when I was 21 years old and have luckily been one ever since.

EMS Coordinator – *Jennifer Antonucci*

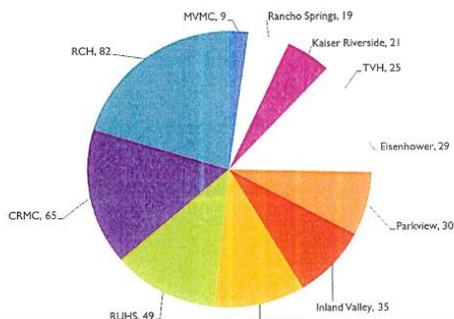

PRE-HOSPITAL DATA

The Pre-Hospital data consists of Average Scene Time, Blood Sugar, Last Known Well Time, and Cincinnati Stroke Screen Test indicators. In Quarter 1 of 2016, there were 406 Riverside County Stroke Patients.

	Quarter 1	Quarter 2	Quarter 3	Quarter 4	Indicator
Scene Time	14 minutes				
Blood Sugar	97.8%				(n=397)
Last Known Well Time	84.0%				(n=341)
Cincinnati Stroke Screen Test	80.0%				(n=325)

HOSPITAL DATA

Stroke Patient by Receiving Hospital, Riverside County, 2016 Quarter 1

Riverside County EMS Agency Q1 Stroke Report

OVERALL DATA

In Quarter 1 of 2016, there were 116 STEMI cases in Riverside County.

	2015 Q4	Quarter 1	Quarter 2	Quarter 3	Quarter 4
Scene Time	16 minutes	16 minutes			
Field Time	33 minutes	31 minutes			
Cardiologist called prior to patient ED Arrival	50.0%	51.7%			
Door-To-Balloon	62 minutes	67 minutes			
EMS-to-Balloon	96 minutes	98 minutes			

HISTORICAL COMPARISON

This data includes all STEMI patients in Riverside County transported by EMS to a SRC Hospital. In Quarter 1 of 2016, the Survival Rate of STEMI patients was 89.7%, lower than previous years.

Total STEMI Cases and Survival Rates, Riverside County, 2011-2016*

Equipment & Facilities – BC Steve Kean

- Station-1: Training room; obtaining additional bids on carpet
- Station-2: Bids being sought for fence completion near courtyard
- Station-3: A/C unit repaired
- Station-4: No activity
- Station-5: Plymovent install completed on July 22

SAFETY/HEALTH – Captain Eric Ackerman

The sixth Life Safety Initiative deals with our medical and physical fitness. The initiative recommends that we, “Develop and implement national medical and physical fitness standards that are equally applicable to all firefighters, based on the duties they are expected to perform.” The initiative goes on to state that our greatest opportunity to reduce line-of-duty deaths is through increased medical surveillance and physical fitness programs.

The Murrieta Fire Department has been proactive regarding physical fitness, through the use of Victory Strength and Conditioning at our stations. Once each month, Kyle, Garrett, or Matt visits each station to help develop workouts specific to the needs of our job. I would encourage all of our members, regardless of your current level of fitness, to work with them to develop a customized program. The workouts are not intended to be “one-size-fits-all,” rather they are adapted to your current condition and are valuable to not only improve fitness, but to also reduce injuries.

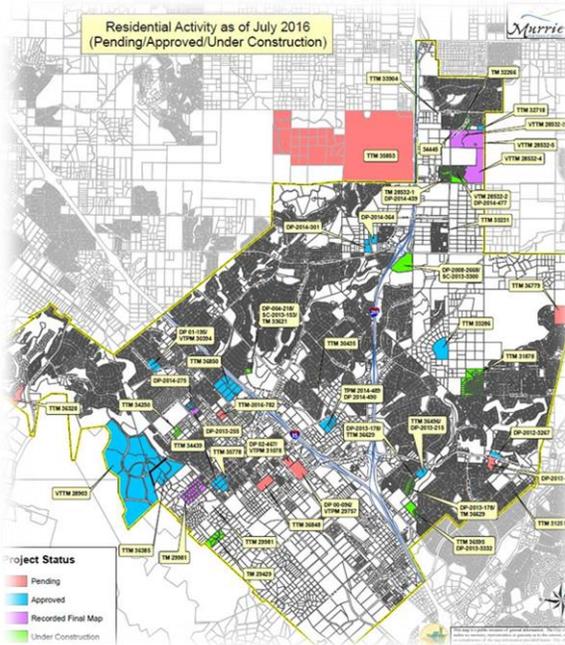

In an effort to support this philosophy, Garrett will periodically be using this section of the weekly to share fitness tips for our members.

PREVENTION – Fire Marshal Jason Briley

Week of July 18 - July 21, 2016

Currently, Murrieta has (461) Single Family Dwellings and (631) Multi-Family units being constructed, totaling (1,092) residential units that will be available soon, and based on what I’ve observed over the past few months, they will be sold/leased/rented before they are complete. It should also be noted that (2,564) additional units are already approved by Murrieta Planning Department and will be breaking ground soon. Fire Prevention is excited to be a part of growing this community.

Mike Almodovar & Nick Vaughn (Public Works Maintenance) were nominated by Captain Matt Corelli for an act that showed compassion and concern for our residents. In May, Mike and Nick came across a young, homeless man that had fallen from a skateboard and sustained a head injury. After being injured, the young man wandered about half a mile from the scene without his skateboard. Not only did they give the injured man water, but Nick went a step further to give the man his own jacket due to cold weather.

Upon arrival, EMS took over the situation, while Mike and Nick left to retrieve the fallen man’s skateboard. Captain Corelli summed up the character of these two men: “If by chance my child ever falls upon misfortune, I just hope he runs into gentlemen with hearts like those two...if any one of those guys would like to work on a fire engine with me, I would take them in a heartbeat!” - *Brian Ambrose*
