

Murrieta Fire & Rescue
41825 Juniper St
Murrieta, CA 92562

Dear Service Provider,

Murrieta Fire & Rescue has instituted a new process for service providers who inspect and test fire protection systems. Effective 02/15/2021, all compliant and non-compliant fire protection system test reports must be sent to Murrieta Fire & Rescue (MFR) electronically by your respective organization via the Compliance Engine's online system at www.thecomplianceengine.com.

Murrieta Fire & Rescue is dedicated to delivering 100% compliance with the City's adopted Fire Code. The Compliance Engine web-based service will aggregate, track, and streamline the collection of inspection data of the City's systems. Further, property owners will receive timely proactive notifications of their testing requirements. Murrieta Fire & Rescue will gain the ability to better mitigate community risk by improving public safety to its citizens.

Service providers who inspect or test fire protection systems within Murrieta's jurisdiction are required to register and submit all tests, inspections, and service reports via the Compliance Engine online system. All fire system inspection reports must be submitted by following the testing schedule and requirements outlined in the City's adopted fire code.

Benefits to vendors:

- Increases market opportunity and demand for vendor fire protection services.
- Ensures all reports are collected and stored electronically, providing the vendor with the ability to track MFR's follow up.
- Enhances maintenance of revenue and the timeliness of correcting deficiencies.
- Improves customer retention with renewal notifications identifying the vendor as the company on record.
- Minimizes non-licensed vendors from working in the fire inspections industry.

This proven process requires the service provider to pay a nominal filing fee at the time of submittal. There is no fee to register your company with the Compliance Engine. Once registered, pricing is viewable under the AHJ icon in the Compliance Engine. If you are a licensed fire protection system contractor and are not currently registered with Brycer, please do so at www.thecomplianceengine.com.

We look forward to collaborating with you to protect and serve the community. We are confident this will benefit us all.

Sincerely,

Sue Ann Herring
