About this segment

Boomburbs

This is the
#1
dominant segment
for this area

In this area
27.0%
of households fall
into this segment

In the United States
1.8%
of households fall
into this segment

An overview of who makes up this segment across the United States

Who We Are

Young professionals with families who have opted to trade up to the newest housing in the suburbs make up this growth market. Original Boomburbs neighborhoods began growing in the 1990s and continued through the peak of the housing boom. Most of those neighborhoods are fully developed now. This is an affluent market but with a higher proportion of mortgages. Rapid growth still distinguishes the Boomburbs neighborhoods, although the boom is more subdued now than it was 10 years ago. So is the housing market. Residents are well-educated professionals with a running start on prosperity.

Our Neighborhood

- Growth markets are in the suburban periphery of large metropolitan areas. Young families are married with children; average household size is 3.25. Home ownership is 84%, with the highest rate of mortgages, 71.5%. Primarily single-family homes, in new neighborhoods, 66% built since 2000. Median home value is \$350,000. Lower housing vacancy rate at 3.7%. The cost of affordable new housing comes at the expense of one of the longest commutes to work, over 30 minutes average, including a disproportionate number (33.6%) commuting across county lines.

Socioeconomic Traits

- Well educated young professionals, 55% are college graduates. High labor force participation at 71.3%; most households have more than two workers. Longer commute times from the suburban growth corridors have created more home workers. Well connected, own the latest devices and understand how to use them efficiently; biggest complaints—too many devices and too many intrusions on personal time. Financial planning is well under way for these professionals.

Market Profile

- Boomburbs residents prefer late model imports, primarily SUVs, and also luxury cars and minivans. This is one of the top markets for the latest in technology, from smartphones to tablets to Internet connectable televisions. Style matters in the Boomburbs, from personal appearance to their homes. These consumers are still furnishing their new homes and already remodeling. Enjoy gardening but more often contract for home services. Physical fitness is a priority, including club memberships and home equipment. Leisure includes a range of activities from sports (hiking, bicycling, swimming, golf) to visits to theme parks or water parks. Residents are generous supporters of charitable organizations.

The demographic segmentation shown here can help you understand the lifestyles and life stages of consumers in a market. Data provider Esri classifies U.S. residential neighborhoods into 67 unique market segments based on socioeconomic and demographic characteristics. Data Source: Esri 2021. Update Frequency: Annually.

About this segment

Up and Coming Families

This is the

#2

dominant segment for this area

In this area

15.4%

of households fall into this segment

In the United States

2.6%

of households fall into this segment

An overview of who makes up this segment across the United States

Who We Are

Up and Coming Families is a market in transition. Residents are younger and more mobile than the previous generation. They are ambitious, working hard to get ahead, and willing to take some risks to achieve their goals. The recession has impacted their financial well-being, but they are optimistic. Their homes are new; their families are young. And this is one of the fastest-growing markets in the country.

Our Neighborhood

- New suburban periphery: new families in new housing subdivisions. Building began in the housing boom of the 2000s and continues in this fast-growing market. Single-family homes with a median value of \$194,400 and a lower vacancy rate. The price of affordable housing: longer commute times

Socioeconomic Traits

- Education: 67% have some college education or degree(s). Hard-working labor force with a participation rate of 71%. Most households (61%) have 2 or more workers. Careful shoppers, aware of prices, willing to shop around for the best deals and open to influence by others' opinions. Seek the latest and best in technology. Young families still feathering the nest and establishing their style.

Market Profile

- Rely on the Internet for entertainment, information, shopping, and banking. Prefer imported SUVs or compact cars, late models. Carry debt from credit card balances to student loans and mortgages, but also maintain retirement plans and make charitable contributions. Busy with work and family; use home and landscaping services to save time. Find leisure in family activities, movies at home, trips to theme parks or the zoo, and sports; from golfing, weight lifting, to taking a jog or run.

The demographic segmentation shown here can help you understand the lifestyles and life stages of consumers in a market. About this segment

Workday Drive

This is the
#3
dominant segment
for this area

In this area
13.7%
of households fall
into this segment

In the United States
3.0%
of households fall
into this segment

An overview of who makes up this segment across the United States

Who We Are

Workday Drive is an affluent, family-oriented market with a country flavor. Residents are partial to new housing away from the bustle of the city but close enough to commute to professional job centers. Life in this suburban wilderness offsets the hectic pace of two working parents with growing children. They favor time-saving devices, like banking online or housekeeping services, and family-oriented pursuits.

Our Neighborhood

- Workday Drive residents prefer the suburban periphery of metropolitan areas. Predominantly single family, homes are in newer neighborhoods, 34% built in the 1990s, 31% built since 2000. Owner-occupied homes have high rate of mortgages at 68%, and low rate vacancy at 4%. Median home value is \$257,400. Most households are married couples with children; average household size is 2.97. Most households have 2 or 3 vehicles; long travel time to work including a disproportionate number commuting from a different county

Socioeconomic Traits

- Education: 40.5% college graduates, more than 72% with some college education. High labor force participation rate at 71%; 2 out of 3 households include 2+ workers. Connected, with a host of wireless devices, anything that enables convenience, like banking, paying bills, or even shopping online. Well insured and invested in a range of funds, from savings accounts or bonds to stocks. Carry a higher level of debt, including first and second mortgages and auto loans.

Market Profile

- Most households own at least 2 vehicles; the most popular types are minivans and SUVs. Family-oriented purchases and activities dominate, like 4+ televisions, movie purchases or rentals, children's apparel and toys, and visits to theme parks or zoos. Outdoor activities and sports are characteristic of life in the suburban periphery. They attend sporting events, as well as participate in them like bicycling, jogging, golfing, and boating. Home maintenance services are frequently contracted, but these families also like their gardens and own the tools for minor upkeep, like lawn mowers, trimmers, and blowers.

The demographic segmentation shown here can help you understand the lifestyles and life stages of consumers in a market. Update Frequency: Annually.

About this segment

The Elders

This is the

#4

dominant segment for this area

In this area

8.1%

of households fall into this segment

In the United States

0.7%

of households fall into this segment

An overview of who makes up this segment across the United States

Who We Are

With a median age of 71.8, The Elders is the oldest market. Residents favor communities designed for senior or assisted living, primarily in warmer climates with seasonal populations. Most of these householders are homeowners, although their housing varies from mobile homes to single-family residences to high-rise apartments. These seniors are informed, independent and involved.

Our Neighborhood

- Suburban periphery of metropolitan areas, primarily in the warmer climates of Florida or Arizona. 45% married couples without children; 44% single households; average household size, 1.68. Owner-occupied housing units; median home value of \$180,000. Housing mix of single-family homes (44%), town homes, and high-density apartment buildings in neighborhoods built from 1970 through 1989. Vacancy rates higher at 24%, due to the number of seasonal or vacation homes. Almost 60% of the population in group quarters in nursing home facilities.

Market Profile

- Vehicles are just a means of transportation, but their first choice is luxury sedans. Most of their cars are older (5+ years). They are connected, but on older PCs or notebooks. Banking is commonly done in person; shopping is by phone or in person. Shopping includes apparel and exercise equipment. They are avid readers, with audio books and e-readers. Newspapers and magazines are staples for news and entertainment. Cable TV is also a must, primarily watching news or movie channels, but also golf, weather, and history channels. Residents are sociable seniors, partial to a variety of clubs and organizations and generous with their time and support.

Socioeconomic Traits

- Predominantly retirees, The Elders has a low labor force participation rate of 22.4%. Those who are still in the labor force tend to be self-employed or part-timers, commonly in real estate, retail or the arts. Their income derives primarily from Social Security (80% of the households), retirement, or investments (almost half of the households). Less than 30% of the households draw wage/salary income. Median household income is lower than the US, but median net worth is much higher. These consumers focus on price, but not at the expense of quality. They prefer to use coupons and buy American and environmentally safe products. Cell phones are common but primarily used to make/receive calls.

The demographic segmentation shown here can help you understand the lifestyles and life stages of consumers in a market. Data provider Esri classifies U.S. residential neighborhoods into 67 unique market segments based on socioeconomic and demographic characteristics. Data Source: Esri 2021. Update Frequency: Annually.

About this segment Pleasantville

This is the
#5
dominant segment
for this area

In this area
5.1%
of households fall
into this segment

In the United States
2.1%
of households fall
into this segment

An overview of who makes up this segment across the United States

Who We Are

Prosperous domesticity best describes the settled denizens of Pleasantville. Situated principally in older housing in suburban areas in the Northeast (especially in New York and New Jersey) and secondarily in the West (especially in California), these slightly older couples move less than any other market. Many couples have already transitioned to empty nesters; many are still home to adult children. Families own older, single-family homes and maintain their standard of living with dual incomes. These consumers have higher incomes and home values and much higher net worth. Older homes require upkeep; home improvement and remodeling projects are a priority—preferably done by contractors. Residents spend their spare time participating in a variety of sports or watching movies. They shop online and in a variety of stores, from upscale to discount, and use the Internet largely for financial purposes.

Our Neighborhood

- Suburban periphery of large metropolitan areas, primarily in Middle Atlantic or Pacific states. Most homes owned (and mortgaged). Households composed of older married-couple families, more without children under 18, but many with children over 18 years. Older, single-family homes: two-thirds built before 1970, close to half from 1950 to 1969. One of the lowest percentages of vacant housing units at 4.5%. Suburban households with 3 or more vehicles and a longer travel time to work

Socioeconomic Traits

- Education: 66% college educated, 37% with a bachelor's degree or higher. Higher labor force participation rate at 67%; higher proportion of HHs with 2 or more workers. Many professionals in finance, information/technology, education, or management. Median household income denotes affluence, with income primarily from salaries, but also from investments or Social Security and retirement income. Not cost-conscious, these consumers willing to spend more for quality and brands they like. Prefer fashion that is classic and timeless as opposed to trendy. Use all types of media equally (newspapers, magazines, radio, Internet, TV).

Market Profile

- Prefer imported SUVs, serviced by a gas station or car dealer. Invest in conservative securities and contribute to charities. Work on home improvement and remodeling projects, but also hire contractors. Have bundled services (TV/Internet/phone). Access the Internet via fiber optics or cable modem, on a newer computer, to pay bills, make purchases, and track investments. Subscribe to premium channels (HBO, Showtime, or Starz) and use video-on-demand to watch TV shows and movies. Enjoy outdoor gardening, going to the beach, visiting theme parks, frequenting museums, and attending rock concerts.

About RPR (Realtors Property Resource)

- Realtors Property Resource® is a wholly owned subsidiary of the National Association REALTORS®.
- RPR offers comprehensive data – including a nationwide database of 164 million properties – as well as powerful analytics and dynamic reports exclusively for members of the NAR.
- RPR's focus is giving residential and commercial real estate practitioners, brokers, and MLS and Association staff the tools they need to serve their clients.
- This report has been provided to you by a member of the NAR.

About RPR's Data

RPR generates and compiles real estate and other data from a vast array of sources. The data contained in your report includes some or all of the following:

- **Listing data** from our partner MLSs and CIEs, and related calculations, like estimated value for a property or median sales price for a local market.
- **Public records data** including tax, assessment, and deed information. Foreclosure and distressed data from public records.
- **Market conditions and forecasts** based on listing and public records data.
- **Census and employment data** from the U.S. Census and the U.S. Bureau of Labor Statistics.
- **Demographics and trends data** from Esri. The data in commercial and economic reports includes Tapestry Segmentation, which classifies U.S. residential neighborhoods into unique market segments based on socioeconomic and demographic characteristics.
- **Business data** including consumer expenditures, commercial market potential, retail marketplace, SIC and NAICS business information, and banking potential data from Esri.
- **School data and reviews** from Niche.
- **Specialty data sets** such as walkability scores, traffic counts and flood zones.

Update Frequency

- Listings and public records data are updated on a continuous basis.
- Charts and statistics calculated from listing and public records data are refreshed monthly.
- Other data sets range from daily to annual updates.
