# Executive Summary

---

The City of Murrieta engaged Willdan Financial Services (Willdan) to determine the full costs incurred by the City to support the various activities for which the City charges user fees. Due to the complexity and the breadth of performing a comprehensive review of fees, Willdan employed a variety of fee methodologies to identify the full costs of individual fee and program activities. This report and the appendices herein identifies 100% full cost recovery for City services and the recommended level of recovery as determined through discussion with departmental staff.

The reality of the local government fee environment is that significant increases to achieve 100% cost recovery can often not be feasible, desirable, or appropriate depending on policy direction —particularly in a single year. The recommended fees identified herein are either at or less than full cost recovery.

---

# User Fee Background

---

## Background

As part of a general cost recovery strategy, local governments adopt user fees to fund programs and services that provide limited or no direct benefit to the community as a whole. As cities struggle to maintain levels of service and variability of demand, they have become increasingly aware of subsidies provided by the General Fund and have implemented cost-recovery targets. To the extent that governments use general tax monies to provide individuals with private benefits, and not require them to pay the full cost of the service (and, therefore, receive a subsidy), the government is limiting funds that may be available to provide other community-wide benefits. In effect, the government is using community funds to pay for private benefit. Unlike most revenue sources, cities have more control over the level of user fees they charge to recover costs, or the subsidies they can institute.

Fees in California are required to conform to the statutory requirements of the California Constitution, Proposition 218, and the California Code of Regulations. The Code also requires that the City Council adopt fees by either ordinance or resolution, and that any fees in excess of the estimated total cost of rendering the related services must be approved by a popular vote of two-thirds of those electors voting because the charge would be considered a tax and not a fee.

## California User Fee History

Before Proposition 13, California cities were less concerned with potential subsidies and recovering the cost of their services from individual fee payers. In times of fiscal shortages, cities simply raised property taxes, which funded everything from police and recreation to development-related services. However, this situation changed with the passage of Proposition 13 in 1978.

Proposition 13 established the era of revenue limitation in California local government. In subsequent years, the state saw a series of additional limitations to local government revenues. Proposition 4 (1979) defined the difference between a tax and a fee: a fee can be no greater than the cost of providing the service; and Proposition 218 (1996) further limited the imposition of taxes for certain classes of fees. As a result, cities were required to secure a supermajority vote in order to enact or increase taxes. Since the public continues to resist efforts to raise local government taxes, cities have little control and very few successful options for new revenues. Compounding this limitation, the State of California took a series of actions in the 1990's and 2000's to improve the State's fiscal situation—at the expense of local governments. As an example, in 2004-05, the Educational Revenue Augmentation Funds (“ERAF”) take-away of property taxes and the reduction of Vehicle License Fees have severely reduced local tax revenues.

In addition, on November 2, 2010, California voters approved Proposition 26, the “Stop Hidden Taxes Initiative”, which is aimed at defining “regulatory fees” as a special tax rather than a fee, thus requiring approval by two-thirds vote of local voters. These regulatory fees are typically intended to mitigate the societal and environmental impacts of a business or person's activities. Proposition 26 contains seven categories of exceptions. The fees analyzed as part of this study fell under categories one through five consisting of charges for specific benefits, government service, regulatory need, for use of government property, or a fine/penalty.

---

## Additional Policy Considerations

The recent trend for municipalities is to update their fee schedules to reflect the actual costs of certain public services primarily benefitting users. User Fees recover costs associated with the provision of specific services benefitting the user, thereby reducing the use of General Fund monies for such purposes.

In addition to collecting the direct cost of labor and materials associated with processing and administering user services, it is common for local governments to recover support costs. Support costs are those costs relating to a local government's central service departments that are properly allocable to the local government's operating departments. Central services support cost allocations were incorporated using the resulting indirect overhead percentages determined through the Cost Allocation Plan. This plan was developed prior to the User Fee study to determine the burden placed upon central services by the operating departments in order to allocate a proportionate share of central service cost.

As labor effort and costs associated with the provision of services fluctuate over time, a significant element in the development of any fee schedule is that it has the flexibility to remain current. Therefore, it is recommended that the City include an inflationary factor in the resolution adopting the fee schedule to allow the City Council, by resolution, to annually increase or decrease the fees.

The City may employ many different inflationary factors. The most commonly used inflator is some form of the Consumer Price Index (CPI) as it is widely well known and accepted. A similar inflator is the implicit price deflator for GDP, which is much like the CPI except that while the CPI is based on the same "basket" of goods and services every year, the price deflators' "basket" can change year to year. Since the primary factor for the cost of a City's services is usually the costs of the personnel involved, tying an inflationary factor that connects more directly to the personnel costs can be suitable if there is a clear method, or current practice of obtaining said factor.

Each City should use an inflator that they believe works the best for their specific situation and needs. It is also recommended that the City perform this internal review annually with a comprehensive review of services and fees performed every three to five years, which would include adding or removing fees for any new or eliminated programs/services.

---

## Study Objective

---

As the City of Murrieta seeks to efficiently manage limited resources and adequately respond to increased service demands, it needs a variety of tools. These tools provide assurance that the City has the best information and the best resources available to make sound decisions, fairly and legitimately set fees, maintain compliance with state law and local policies, and meet the needs of the City administration and its constituency. Given the limitations on raising revenue in local government, the City recognizes that a User Fee Study is a very cost-effective way to understand the total cost of services and identify potential fee deficiencies. Essentially, a User Fee is a payment for a requested service provided by a local government that primarily benefits an individual or group.

The total cost of each service included in this analysis is based on the full cost of providing City services, including direct salaries and benefits of City staff, direct departmental costs, and indirect costs from central service support. This study determines the full cost recovery fee for the City to provide each service; however, each fee is set at the City's discretion, up to 100% of the total cost, as specified in this report.

The principal goal of the study was to help the City determine the full cost of the services that the City provides. In addition, Willdan established a series of additional objectives including:

- Developing a rational basis for setting fees;
- Identifying subsidy amount, if applicable, of each fee in the model;
- Ensuring compliance with State law;
- Developing an updatable and comprehensive list of fees, and;
- Maintaining accordance with City policies and goals

The study results will help the City better understand its true costs of providing services and may serve as a basis for making informed policy decisions regarding the most appropriate fees, if any, to collect from individuals and organizations that require individualized services from the City.

## Scope of the Study

The scope of this study encompasses a review and calculation of the user fees charged by the following Murrieta departments and fee groups:

- Business License
- Community Services District
- Parks & Recreation
- Library
- Miscellaneous City Wide
- Code Enforcement
- Building & Safety
- Planning
- Public Works/Engineering

- Fire
- Police
- Geographic Information Systems (GIS)

The study involved the identification of existing and potential new fees, fee schedule restructuring, data collection and analysis, orientation and consultation, quality control, communication and presentations, and calculation of individual service costs (fees) or program cost recovery levels.

## **Aim of the Report**

The User Fee Study focused on the cost of City services, as City staff currently provides them at existing, known, or reasonably anticipated service and staff levels. This report provides a summary of the study results, and a general description of the approach and methods Willdan and City staff used to determine the recommended fee schedule. The report is not intended to document all of the numerous discussions throughout the process, nor is it intended to provide influential dissertation on the qualities of the utilized tools, techniques, or other approaches.

---

# Project Approach and Methodology

---

## Conceptual Approach

The basic concept of a User Fee Study is to determine the “reasonable cost” of each service provided by the City for which it charges a user fee. The full cost of providing a service may not necessarily become the City’s fee, but it serves as the objective basis as to the maximum amount that may be collected.

The standard fee limitation established in California law for property-related (non-discretionary) fees is the “estimated, reasonable cost” principle. In order to maintain compliance with the letter and spirit of this standard, every component of the fee study process included a related review. The use of budget figures, time estimates, and improvement valuation clearly indicates reliance upon estimates for some data.

## Fully Burdened Hourly Rates

The total cost of each service included in this analysis is primarily based on the Fully Burdened Hourly Rates (FBHRs) that were determined for City personnel directly involved in providing services. The FBHRs include not only personnel salary and benefits, but also any costs that are reasonably ascribable to personnel. The cost elements that are included in the calculation of fully burdened rates are:

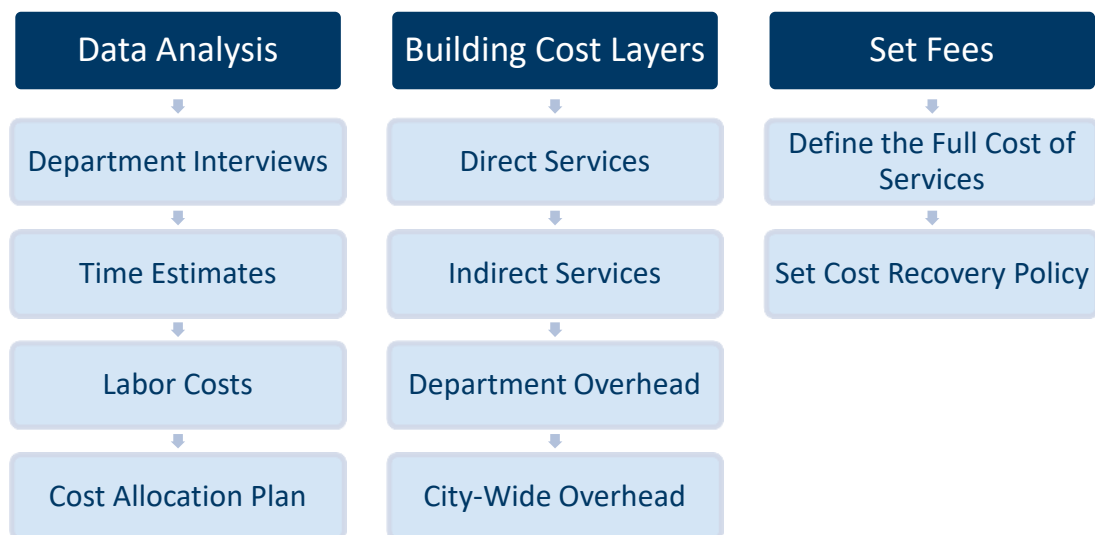

- Salaries & benefits of personnel involved
- Operating costs applicable to fee operations
- Departmental support, supervision, and administration overhead
- Indirect City-wide overhead costs calculated through the Cost Allocation Plan

An important factor in determining the fully burdened rate is in the calculation of productive hours for personnel. This calculation takes the available workable hours in a year of 2,080 and adjusts this figure to account for calculated or anticipated hours’ employees are involved in non-billable activities such as paid vacation, sick leave, emergency leave, holidays, and other considerations as necessary. Dividing the full cost by the number of productive hours provides the FBHR.

The FBHRs are then used in conjunction with time estimates, when appropriate, to calculate a fee’s cost based on the personnel and the amount of their time that is involved in providing each service.

## Summary Steps of the Study

The methodology to evaluate most User Fee levels is straightforward and simple in concept. The following list provides a summary of the study process steps:

## Allowable Costs

This report identifies three types of costs that, when combined, constitute the fully burdened cost of a service (**Appendix A**). Costs are defined as direct labor, including salary and benefits, departmental overhead costs, and the City’s central services overhead, where departmental and central service overhead costs constitute support costs. These cost types are defined as follows:

- **Direct Labor (Personnel Costs):** The costs related to staff salaries for time spent directly on fee-related services.
- **Departmental Overhead:** A proportional allocation of departmental overhead costs, including operation costs such as supplies and materials that are necessary for the department to function.
- **Central Services Overhead:** These costs, detailed in the City’s Cost Allocation Plan, represent services provided by those Central Services Departments whose primary function is to support other City departments.

---

## Methodology

The two methods of analysis for calculating fees used in this report are the:

**Case Study Method (Standard Unit Cost Build-Up Approach):** This approach estimates the actual labor and material costs associated with providing a unit of service to a single user. This analysis is suitable when City staff time requirements do not vary dramatically for a service, or for special projects where the time and cost requirements are easy to identify at the project's outset. Further, the method is effective in instances when a staff member from one department assists on an application, service or permit for another department on an as-needed basis. Costs are estimated based upon interviews with City staff regarding the time typically spent on tasks, a review of available records, and a time and materials analysis.

**Programmatic Approach:** In some instances, the underlying data is not available or varies widely, leaving a standard unit cost build-up approach impractical. In addition, market factors and policy concerns (as opposed to actual costs) tend to influence fee levels more than other types of services. Willdan employed a different methodology where appropriate to fit the programs' needs and goals. Typical programmatic approach cases are facility use fees, penalties, and instances where a program cost is divided over the user base to obtain a per applicant cost for shared cost services.

## Quality Control/Quality Assurance

All study components are interrelated, thus flawed data at any step in the process will cause the ultimate results to be inconsistent and unsound. The elements of our Quality Control process for User Fee calculations include:

- Involvement of knowledgeable City staff
- Clear instructions and guidance to City staff
- Reasonableness tests and validation
- Normalcy/expectation ranges
- Internal and external reviews
- Cross-checking

## Reasons for cost increases/decreases over current fees

Within the fee tables in **Appendix C**, the differences are identified between the full costs calculated through the study and the fee levels currently in effect. The reasons for differences between the two can arise from a number of possible factors including:

- Previous fee levels may have been set at levels less than full cost intentionally, based on policy decisions
- Staffing levels and the positions that complete fee and service activity may vary from when the previous costs were calculated
- Personnel and materials costs could have increased at levels that differed from any inflationary factors used to increase fees since the last study

- Costs that this study has identified as part of the full cost of services may not have been accounted for in a previous study
  - Departmental overhead and administration costs
  - Vehicle and Facility Maintenance support costs
  - Indirect overhead from the Cost Allocation Plan
- Changes in processes and procedures within a department, or the City as a whole

## City Staff Contributions

As part of the study process, Willdan received tremendous support and cooperation from City staff, which contributed and reviewed a variety of components to the study, including:

- Budget and other cost data
- Staffing structures
- Fee and service structures, organization, and descriptions
- Direct and indirect work hours (billable/non-billable)
- Time estimates to complete work tasks
- Review of draft results and other documentation

A User Fee Study requires significant involvement of the managers and line staff from the departments—on top of their existing workloads and competing priorities. The contributions from City staff were critical to this study. We would like to express our appreciation to the City and its staff for their assistance, professionalism, positive attitudes, helpful suggestions, responsiveness, and overall cooperation.

---

# Murrieta User Fees

---

## Cost Recovery

The cost recovery models, by department/division fee type, are presented in detail in **Appendix C**. Full cost recovery is determined by summing the estimated amount of time each position (in increments of minutes or hours) spends to render a service. Time estimates for each service rendered were predominately determined by Willdan and City Staff through a time and materials survey conducted for each department/division fee included in the study. The resulting cost recovery amount represents the total cost of providing each service. The City's current fee being charged for each service, if applicable, is provided in this section, as well, for reference.

It is important to note that the time and materials survey used to determine the amount of time each employee spends assisting in the provision of the services listed on the fee schedule is essential in identifying the total cost of providing each service. Specifically, in providing services, a number of employees are often involved in various aspects of the process, spending anywhere from a few minutes to several hours on the service.

A primary goal of this study was to identify the cost of City services, to provide information to help the City make informed decisions regarding the actual fee levels and charges. The responsibility to determine the final fee levels is a complicated task. City staff must consider many issues in formulating recommendations, and the City Council must consider those same issues and more in making the final decisions.

City staff assumes the responsibility to develop specific fee level recommendations to present to the City Council. Unfortunately, there are no hard and fast rules to guide the City, since many of the considerations are based on the unique characteristics of the City of Murrieta, and administrative and political discretion. However, in setting the level of full cost recovery for each fee, one should consider whether the service solely benefits one end user or the general community.

## Subsidization

Recalling the definition of a user fee helps guide decisions regarding subsidization. The general standard is that individuals (or groups) who receive a wholly private benefit should pay 100% of the full cost of the services. In contrast, services that are simply public benefit should be funded entirely by the general fund's tax dollars. Unfortunately, for the decision makers, many services fall into the range between these two extremes.

Further complicating the decision, opponents of fees often assert that the activities subject to the fees provide economic, cultural, "quality of life," or other community benefits that exceed the costs to the City.

It is recommended the City consider such factors during its deliberations regarding appropriate fee levels.

Of course, subsidization can be an effective public policy tool, since it can be used to reduce fees to encourage certain activities (such as compliance inspections to ensure public safety) or allow some people to be able to afford to receive services they otherwise could not at the full cost. In addition, subsidies can

be an appropriate and justifiable action, such as to allow citizens to rightfully access services, without burdensome costs.

Despite the intent, it is important for the City and public to understand that subsidies must be covered by another revenue source, such as the General Fund. Therefore, the general taxpayer will potentially help to fund private benefits, and/or other City services will not receive funds that are otherwise directed to cover subsidies.

## Impact on Demand (Elasticity)

Economic principles of elasticity suggest that increased costs for services (higher fees) will eventually curtail the demand for the services; whereas lower fees may spark an incentive to utilize the services and encourage certain actions. Either of these conditions may be a desirable effect to the City. However, the level of the fees that would cause demand changes is largely unknown. The Cost of Service Study did not attempt to evaluate the economic or behavioral impacts of higher or lower fees; nevertheless, the City should consider the potential impacts of these issues when deciding on fee levels.

## Summary

If the City's principal goal of this study were to maximize revenues from user fees, Willdan would recommend setting user fees at 100% of the full cost identified in this study. However, we understand that revenue enhancement is not the only goal of a cost of service study, and sometimes full-cost recovery is not needed, desired, or appropriate. Other City and departmental goals, City Council priorities, policy initiatives, past experience, implementation issues, and other internal and external factors may influence staff recommendations and City Council decisions. In this case, the proper identification of additional services (new or existing services) and creation of a consistent and comprehensive fee schedule was the primary objective of this study. City staff has reviewed the full costs and identified the "recommended fee levels" for consideration by City Council. The attached appendices exhibit these unit fees individually.

The preceding sections provide background for each department or division and the results of this study's analysis of their fees. For the full list of each fee's analysis, refer to **Appendix C** of this report.

---

## Business License

---

Every person or entity planning to engage in business within city limits, regardless of whether the business is subject to taxation or not, must apply for a license, pay applicable fees, and obtain the appropriate approvals in order to procure a license.

"Business" means profession, trade, occupation, gainful activities, and all and every kind of professional, commercial, and industrial calling whether or not carried on for profit.

### Analysis

Willdan individually reviewed the services associated with Business License. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of the Business License services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering the costs associated with the requested service. The analysis found that most flat rate fees are currently set below the full cost of providing the service. It is recommended that the City set Business License fees at or near 100% cost recovery for most fees as detailed in [Appendix C](#):

- An increase for 7 fees;
- 3 fees would decrease, and;
- 2 fees would remain as currently set, and;
- the average estimated fee increase would be around 8% as detailed in [Appendix C](#).

---

## Community Services District

---

Community Services District provides safe, clean, beautiful, and accessible facilities, parks and open spaces, as well as offer diverse leisure activities for all people in the areas of recreation, education, and culture. Building on Community Services' rich heritage, we will continue to create community through people, parks, and programs.

### Analysis

Willdan individually reviewed the services associated with the Community Services District. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of the Community Services District services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering the costs associated with the requested service. The analysis found that most flat rate fees are currently set below the full cost of providing the service. It is recommended that the City set Community Services District fees at 100% cost recovery for most fees as detailed in [Appendix C](#):

- An increase for 8 fees,
- No fees would decrease, and;
- 11 new fees would be added
- the average estimated fee increase would be around 122% as detailed in [Appendix C](#).

---

## Parks & Recreation

---

The Murrieta Community Services Department provides safe, clean, beautiful, and accessible facilities, parks, and open spaces, as well as offer diverse leisure activities for all people in the areas of recreation, education, and culture. Currently, there are 52 parks in Murrieta and over 20 miles of hiking and running trails. Additionally, recreational programming and wonderful facilities are central to Murrieta's identity. Every year, the department holds numerous special events such as the Birthday Bash, Veterans Day Parade, Holiday Magic, and other signature events.

### Analysis

Willdan individually reviewed the services and programs associated with the Parks & Recreation Department. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of most Parks & Recreation programs encompassed facility rentals and other recreation services. The fee for use of government owned facilities and property can be set discretionally by the City per Proposition 26 to reduce the cost to the public for the facilities, and because there is market availability for facility use by the public. The cost of acquisition, maintenance, repair, and upgrade to the City and subsequently the community is offset by rental or use fee revenue. As such these fees should be set using the knowledge of activity use for the facilities, policy desires of the City, and market factors when desirable. It is generally accepted that many Recreation programs provide a measure of public benefit to the residents and City as a whole. In addition, cities generally want to ensure that their programs and services remain affordable to the community at large, and that the programs remain competitive with surrounding jurisdictions and private businesses. The analysis of most of the services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine whether the current fee is recovering the costs associated with the requested service. The analysis found that current services are being heavily subsidized as is typical for Parks & Recreation. Staff has suggested reasonable fee adjustments to the fee schedule and they are detailed in [Appendix C](#). As a result, there would be:

- An increase for 52 fees;
- 3 fees would decrease;
- 5 fees would change to Actual Cost from flat or percentage-based fee;
- 78 new fees would be added;
- 33 fees would remain as currently set, and;
- the average estimated fee increase would be around 27% as detailed in [Appendix C](#).

---

# Library

---

The Murrieta Public Library is dedicated to providing a vibrant environment with open access to exceptional services, collections, and programs while continuing to promote the joy of reading for an empowered and successful community. The Library provides informational, recreational and educational resources, and programs for all ages in the community.

## Analysis

Willdan individually reviewed the services and programs associated with Library. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of service fees in Library relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee would recover the costs associated with the requested service. All other items listed in Library are penalties, regulated, rental, or use related and can be set based on dissuading those activities for penalties, at their regulated levels, or at market rates for rental and use fees, respectively. Staff has suggested reasonable fee adjustments to the fee schedule and they are detailed in **Appendix C**. As a result, there would be:

- an increase to 17 fees;
- no fees would decrease;
- 18 fees would be added;
- 8 fees would remain as currently set, and;
- the average estimated fee increase would be around 12%.

---

## Miscellaneous City Wide

---

Miscellaneous City Wide fees include Electric Charging fees, Documents/Services, Geographic Information Services, and Photocopies.

### Analysis

Willdan individually reviewed the services associated with Miscellaneous City Wide. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of the Miscellaneous City Wide services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering the costs associated with the requested service. The analysis found that most flat rate fees are currently set below the full cost of providing the service. It is recommended that the City set Miscellaneous City Wide fees at or near 100% cost recovery for most fees as detailed in **Appendix C**:

- an increase to 11 fees;
- 2 fees would decrease;
- 1 new fee would be added;
- 1 fee would change to a per kW from a per hour fee;
- 23 fees would remain as currently set, and;
- the average estimated fee increase would be around 1%.

---

# Code Enforcement

---

Code Enforcement ensures residents and businesses comply with the City's various land use codes and nuisance regulations.

## Analysis

Willdan individually reviewed the services and programs associated with Code Enforcement. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The services included in Code Enforcement are a mixture of citations and user fees. The citations are set to deter the listed activities, and the analysis of the user fee relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering the costs associated with the requested service. It is recommended that the City set Code Enforcement fees at 100% cost recovery for most fees as detailed in **Appendix C**:

- an increase to 6 fees;
- no fees would decrease;
- 4 new fees would be added;
- 3 fees would remain as currently set, and;
- the average estimated fee increase would be around 17% as detail in **Appendix C**.

---

## Building & Safety

---

Building and Safety Division ensures new development meets state and local building standards through plan check and building inspection.

### Analysis

Willdan individually reviewed the services and programs associated with the Building and Safety Division. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of Building and Safety services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering the costs associated with the requested service. The analysis found that services are currently set below the full cost of providing them. It is recommended that the City increase cost recovery at or near 100% for Building services as detailed in [Appendix C](#). As a result, there would be:

- an increase to 558 fees;
- 7 fees would decrease;
- 10 fees would change to a per sq ft from Actual cost;
- 6 new fees would be added;
- 31 fees would remain as currently set, and;
- the average estimated fee increase would be around 14% as detail in [Appendix C](#).

---

## Planning

---

Planning Division Implements and updates the City's land development regulations through plan review and long range planning functions, respectively.

### Analysis

Willdan individually reviewed the services and programs associated with the Planning Division. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of Planning services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering the costs associated with the requested service. The analysis has shown that in general, Planning services are currently under recovering the cost of providing services. It is recommended that the City increase cost recovery at or near 100% for Planning services as detailed in **Appendix C**. As a result, there would be:

- an increase to 41 fees;
- 3 fees would decrease;
- 2 new fees would be added;
- 9 fees would change to Consultant Actual Cost or Deposit based from a flat fee;
- 21 fees would remain as currently set, and;
- the average estimated fee increase would be around 16% as detail in **Appendix C**.

---

## Public Works/Engineering

---

The Public Works/Engineering Department is responsible for the design, construction and maintenance of public infrastructure while providing the services necessary to enhance the safety and quality of life in the city through the management, maintenance, and enhancement of city resources.

### Analysis

Willdan individually reviewed the services and programs associated with the Public Works/Engineering Department. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of Public Works/Engineering Services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering the costs associated with the requested service. The analysis found that current fee levels are subsidizing the cost for most services. It is recommended that the City increase most Public Works Services fees to improve cost recovery as detailed in [Appendix C](#), with some specific fees set to retain subsidies. As a result, there would be:

- an increase to 56 fees;
- 22 new fees would be added;
- 2 fees would go to Actual cost from a flat fee;
- 103 fees would remain as currently set;
- 12 fees would decrease, and;
- the average estimated increase for current fees would be around 6% for flat fee services.

---

# Fire

---

Murrieta Fire & Rescue (MFR) is a dedicated team committed to serving the community by providing all risk emergency and non-emergency services

## Analysis

Willdan individually reviewed the services and programs associated with the Fire Department. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of Fire services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering the costs associated with the requested service. The analysis found that services are currently set below the full cost of providing them. It is recommended that the City increase cost recovery at or near 100% for Fire services as detailed in [Appendix C](#). As a result, there would be:

- an increase to 226 fees;
- 3 fees would decrease;
- 44 new fees would be added;
- 3 fees would remain as currently set, and;
- the average estimated fee increase would be around 24% as detail in [Appendix C](#).

---

## Police

---

The Police Department serves as the primary law enforcement agency for the City of Murrieta, and consists of three primary operating divisions within the Police Department.

1. Administration Division – Responsible for the overall administration of the police department, to include personnel, recruitment, fiscal oversight, facilities, fleet, and grants.
2. Operations Division – Responsible for overseeing the patrol division and a variety of special and operational functions, which include the Traffic Bureau, K9 Program, Reserve Police Officer Program, Parole/Probation Compliance Team, and the Crisis Response Unit (SWAT and Crisis Negotiation Team).
3. Support Division – Supports the department’s primary service of field operations through functional bureaus that include Communications (Dispatch), Records, Investigations, Juvenile Investigations, and Property and Evidence.

## Analysis

Willdan individually reviewed the services and programs associated with the Police Department. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of Police services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering the costs associated with the requested service. The analysis found that services are currently set below the full cost of providing them. It is recommended that the City increase cost recovery at or near 100% for Police services as detailed in [Appendix C](#). As a result, there would be:

- an increase to 13 fees;
- 1 fee would be added;
- 1 fee would decrease;
- 15 fees would remain as currently set, and;
- the average estimated fee increase would be around 22% as detail in [Appendix C](#).

---

## Geographic Information Systems

---

Information Technology Services provides support to City departments through the deployment and management of innovative technology solutions; supports public access to City services and records through the development and maintenance of outward facing technology. Create and maintain Geographic Information System (GIS) mapping tools for staff and the public.

### Analysis

Willdan individually reviewed the services and programs associated with Geographic Information Systems. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of GIS services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering the costs associated with the requested service. The analysis found that services are currently set below the full cost of providing them. It is recommended that the City increase cost recovery at or near 100% for GIS services as detailed in **Appendix C**. As a result, there would be:

- an increase to the GIS General & Professional Services fee;
- the GIS Processing fee would remain as currently set, and;
- the average estimated fee increase would be around 10% as detail in **Appendix C**.

## Appendix A – Total Allowable Cost to be Recovered

Below are the total allowable costs that may be recovered through User Fees; however, only a percentage of the total cost is realized as staff doesn't just work on services related to User Fees, but also work on an array of other City functions during the operational hours of the City. The amounts listed below will not reconcile to City budgets as costs that should not be included in overhead for personnel in the application of determining fully burdened hourly rates were excluded. Examples of these costs are capital, debt, monetary transfers, passthrough contract costs, and any other costs that is charged directly to the service requestor.

### City of Murrieta - User Fee Overhead Rate Calculations

Department	Total Salaries & Benefits	Department Operations & Administration	Direct Overhead %	Indirect Allocation %

## Appendix B – Fully Burdened Hourly Rates

Below are fully burdened hourly rates of staff positions that provide for the services detailed in **Appendix C**. The FBHRs were used to determine the full cost of each service. They include the salary and benefit costs for each position as well as all applicable overhead amounts for each position. For positions in central service departments, such as the City Clerk and Finance, what is shown is the salary and benefit rate only, as the overhead of central service departments is recovered through the cost allocation plan. When a central service department position works on a fee or project in the purview of an operating department, the overhead rates of the operating department (shown in **Appendix A**) will be applied to that central service positions' salary and benefit rate for full cost recovery. For any user fee service request that is outside the scope of the fees detailed in **Appendix C**, or for services for which there is no fee currently set, the City can charge up to the full cost of the FBHR for personnel involved.

## Appendix C – Cost Recovery Analysis

---

The following tables provide the results of the analysis, resulting full cost recovery amount, and recommended fees. For fees, services, and penalties in which the full cost, existing fee and suggested fee is listed as “NA”, the amount or percentage was not calculable based on cost data or variable fee structure. This is most common when either the current or the suggested fee includes a variable component that is not comparable on a one-to-one basis, a full cost was not calculated (for penalties, fines, market-based fees, or items not included in the study), or when there is not a current fee amount to compare against.

All services and fees analyzed as part of this study fall under one or multiple categories one through five of the exemptions defined in Proposition 26. As such a cost analysis was performed to calculate the estimated reasonable full cost of each service, and suggested fees are recommended at or below those amounts. Estimated reasonable full costs were calculated based on City expenditures and time estimates.

To provide a thorough list of all fees and services, the schedules also include items that were not part of the scope of this study. Examples of such items are utility rates, taxes, in-lieu fees, and developer impact fees.

170	Inspection			
171	Self Inspections - Low Fire Risk Businesses	New		Self Inspections are for low fire risk businesses that have already passed their first annual business inspection. The business may opt to have one of their managers complete a self inspection based on MFR's check list, take photos, certify to the accuracy of inspection and submit online. Review time by Deputy Fire Marshal is 30-minutes. The annual self inspection saves the client user fee costs and reduces MFR's time.
